CANADIAN AERONAUTICAL JOURNAL

Index to Volume 6

| A | PAGE | PAGE |
|---|--|---|
| Advances in Aircraft Fuels, Recent: R. G. Davies | 320 | Fundamentals of Rocket Propulsion: R. E. Wiech, |
| Advances in Ball and Roller Bearings, Recent: | | Jr., and R. F. Strauss |
| T. H. Cooper | 164 | 345 |
| Aerofoil having a Cusped Cavity and a Blowing Jet at the Cusp, Brief Experiments on a Flapped: | | Guide to the Space Age: C. W. Besserer and |
| A. D. Wood | 309 | H. C. Besserer |
| Aerofoil with a Split Flap, Potential Flow about an: | | 194 |
| P. Mandl | 123 | High Temperature Materials: R. F. Hehemann and |
| Air Intake for a Small Shaft Power Gas Turbine, The Design and Testing of an: J. H. T. Wade | 207 | G. Mervin Ault |
| Air to Ground Telemetry and Data Reduction System, An: W. R. M. McLellan | 126 | Hypersonic Flow: A. R. Collar and J. Tinkler |
| Aircraft Dynamic Stability Derivatives, Methods of Measurement of: K. J. Orlick-Rückemann | 414 | Introduction to the Mechanics of the Solar System: |
| Aircraft Fuels, Recent Advances in: R. G. Davies | 320 | R. Kurth |
| Aircraft Fluid Filters, An Engineering Approach to the Rating of: J. W. Noonan | 196 | 237 |
| Aircraft Maintenance, Comments on the Evolution of: | | Introduction to Rocket Technology: |
| I. J. Kessler | 178, 225 | V. I. Feodosiew and G. B. Siniarev |
| Aircraft Propeller Design, New Problem Areas in: | | 113 |
| G. Rosen | 213 | Introduction to Stress Analysis: C. O. Harris |
| Aircraft, The Fan-in-Wing Powerplant System for VTOL: E. P. Cockshutt and N. Galitzine | 350 | 154 |
| Aircraft, Trajectories of Objects Ejected from: | | Introduction to the Theory of Compressible Flow: |
| K. Korsak | 3 | Shih-I Pai |
| Aircraft, Weapon, and Electronic Support Systems, Reliability-Maintainability Engineering of: | | 114 |
| C. I. Soucy | 400 | Medical Aspects of Flight Safety: E. Evrard et al |
| Airplane, The Development of the STOL: | | |
| A. F. MacDonald | 203 | Magnesium and its Alloys: C. S. Roberts |
| Altimetry, Vertical Flight Control by Pressure Altitude—A Revised System of: W. R. Fryers | 426 | Mechanical Properties of Intermetallic Compounds: |
| Amendment of the Bylaws | 32 | J. H. Westbrook |
| Appraisal of Synthetic Lubricants in Aircraft Gas Turbines, An: J. P. Perry | 156 | 293 |
| Astronomy, Space: J. L. Locke | 244 | Mechanics of Materials: A. Higdon, E. H. Ohlsen and W. R. Stiles |
| Aviation and Northern Development: R. G. Robertson | | 292 |
| B | | Organizing the Technical Conference: |
| Bearings, Recent Advances in Ball and Roller: | | H. S. Kindler |
| T. H. Cooper | 164 | 293 |
| Bonn, C.: Parachutes and Their Growth | 98 | Physics and Medicine of the Atmosphere and Space: O. O. Benson, Jr., and H. Strughold |
| Book Reviews | | 292 |
| Advanced Propulsion Systems: M. Alperin and G. P. Sutton | 290 | Proceedings of the Fourth Midwestern Conference on Solid Mechanics |
| Advances in Semi-Conductor Sciences: H. Brooks | | 290 |
| Advances in Aeronautical Sciences: | | Progress in Metal Physics — Vol. 7: B. Chalmers |
| T. von Kármán et al | 236 | 154 |
| Aero-Thermodynamics and Flow in Turbomachines: M. H. Vavra | 345 | Selected Topics on Ballistics: W. C. Nelson |
| Aircraft and Missile Design and Maintenance Handbook: C. A. Overby | 237 | 290 |
| Combustion and Propulsion: 3rd AGARD Colloquium: M. W. Thring et al | 114 | Space Technology: H. S. Seifert |
| Dictionary of Aeronautical Engineering: | | 236 |
| J. L. Naylor | 236 | Surface Effects on Spacecraft Materials: |
| Fluid Control Power: J. F. Blackburn, G. Reethof and J. L. Shearer | 291 | F. L. Clauss |
| Foundations of Aerodynamics: Second Edition: A. M. Kuethe and J. D. Schetzer | 194 | 238 |
| C | | Theory of Mechanical Vibration: K. N. Tong |
| C.A.I. Log | 33, 69, 105, 141, 185, 230, 264, 337, 385, 431 | 194 |
| Canadair CL-41 | | Cavitation on Hydrofoil Craft Design, The Influence of: M. C. Eames |
| | | 16 |
| Cockshutt, E. P., and N. Galitzine: The Fan-in-Wing Powerplant System for VTOL Aircraft | | Comments on the Evolution of Aircraft Maintenance: |
| | | I. J. Kessler |
| | | 178, 225 |
| Compressively Stress-Relieved forgings: | | Conferences, International |
| R. Smallman-Tew | | 10 |
| Conferences, International | | Foundations of Aerodynamics: Second Edition: A. M. Kuethe and J. D. Schetzer |
| | | 104, 394 |

| PAGE | PAGE | | |
|---|------|---|----------|
| Cooper, T. H.: Recent Advances in Ball and Roller Bearings | 164 | The STOL Otter | 298 |
| Considerations for the Manned Orbiting Vehicle, Some Engineering: R. A. Stubbs | 375 | DHC-4 Caribou | 298 |
| D | | The X-15 | 298 |
| Data Reduction System, An Air to Ground Telemetry and: W. R. M. McLellan | 126 | Fifty Years of Flight, Some Thoughts on the Next: P. A. Hartman | 54 |
| Davies, R. G.: Recent Advances in Aircraft Fuels | 320 | Filters, An Engineering Approach to the Rating of Aircraft Fluid: J. W. Noonan | 196 |
| Defence Research Board's Satellite | 80 | Finishes for Aircraft and Components, Protective: P. E. Lamoureux | 48 |
| Design and Testing of an Air Intake for a Small Shaft Power Gas Turbine, The: J. H. T. Wade | 207 | Flap, Potential Flow about an Aerofoil with a Split: P. Mandl | 123 |
| Design, A Philosophy of Jet Transport: A. E. Raymond | 299 | Flapped Aerofoil Having a Cusped Cavity and a Blowing Jet at the Cusp, Brief Experiments on a: A. D. Wood | 309 |
| Design Aspects, Supersonic Transports—Some: L. T. Goodmanson | 46 | Flight, Man-Powered | 184 |
| Design, New Problem Areas in Aircraft Propeller: G. Rosen | 213 | Flow about an Aerofoil with a Split Flap, Potential: P. Mandl | 123 |
| Design, The Influence of Cavitation on Hydrofoil Craft: M. C. Eames | 16 | Force Machine, N.A.E. Standard | 296 |
| Development of the STOL Airplane, The: A. F. MacDonald | 203 | Forgings, Compressively Stress-Relieved: R. Smallman-Tew | 10 |
| Dynamic Stability Derivatives, Methods of Measurement of Aircraft: K. J. Orlit-Rückemann | 414 | Fryers, W. R.: Vertical Flight Control by Pressure Altitude—A Revised System of Altimetry | 426 |
| E | | Fuels, Recent Advances in Aircraft: R. G. Davies | 320 |
| Eames, M. C.: The Influence of Cavitation on Hydrofoil Craft Design | 16 | Future Uses of Space Vehicles: K. J. Radford | 423 |
| Editorials | | G | |
| Canada's Participation: D. C. Rose | 79 | Galitzine, N., and E. P. Cockshutt: The Fan-in-Wing Powerplant System for VTOL Aircraft | 350 |
| Changing Conditions: B. W. Pitfield | 41 | Gas Turbine, The Design and Testing of an Air Intake for a Small Shaft Power: J. H. T. Wade | 207 |
| Everyone an Air Traveller: G. R. McGregor | 347 | Gas Turbines, An Appraisal of Synthetic Lubricants in Aircraft: J. P. Perry | 156 |
| External Affairs | 195 | Goodmanson, L. T.: Supersonic Transports—Some Design Aspects | 46 |
| Fund of Reference, A | 115 | Ground Telemetry and Data Reduction System, An Air to: W. R. M. McLellan | 126 |
| Industrial Counter-Revolution, The: F. T. Job in Hand, The: P. G. Masefield and W. Littlewood | 155 | H | |
| Naval Air: H. S. Rayner | 393 | Haehnel, W. F.: Instrumentation for Navigation | 363 |
| Place of Research and Development in Production Sharing, The: Raymond O'Hurley | 295 | Half Model Testing in Wind Tunnels: J. A. van der Bliek | 59 |
| President's Message, The: David Boyd | 239 | Hall, A. H.: A Preliminary Analysis of the Penalties Associated with Piercing a Wing Torsion Box with a Grid of Holes | 90 |
| Electronic Support Systems, Reliability-Maintainability Engineering of Aircraft, Weapon, and: C. I. Soucy | 400 | Harvie, T. A.: Engineers and Management | 315 |
| Engine, The By-Pass: A. G. Newton | 257 | Hartman, P. A.: Some Thoughts on the Next Fifty Years of Flight | 54 |
| Engineers and Management: T. A. Harvie | 315 | Henshaw, D. H.: Towards Still Shorter Takeoffs and Landings | 119 |
| Engineering Approach to the Rating of Aircraft Fluid Filters, An: J. W. Noonan | 196 | Holman, D. M.: The Second International Congress in the Aeronautical Sciences | 394 |
| Engineering Considerations for the Manned Orbiting Vehicle, Some: R. A. Stubbs | 375 | Hydrofoil Craft Design, The Influence of Cavitation on: M. C. Eames | 16 |
| Engineering of Aircraft, Weapon, and Electronic Support Systems, Reliability-Maintainability: C. I. Soucy | 400 | I | |
| Experiments on a Flapped Aerofoil Having a Cusped Cavity and a Blowing Jet at the Cusp, Brief: A. D. Wood | 309 | Industry We Serve, The: F. T. Wood | 240 |
| Exploration of Space, The Scientific: G. D. Watson | 81 | Instrumentation for Navigation: W. F. Haehnel | 363 |
| F | | Influence of Cavitation on Hydrofoil Craft Design, The: M. C. Eames | 16 |
| Fan-in-Wing Powerplant System for VTOL Aircraft, The: E. P. Cockshutt and N. Galitzine | 350 | Intake for a Small Shaft Power Gas Turbine, The Design and Testing of an Air: J. H. T. Wade | 207 |
| Film Notices | | International Conferences | 104, 394 |
| The Man, The Machine, The Method | 294 | | |
